

Due to the importance of sanitizing, elimination of scale and therefore maintenance of steam generators for Turkish Bath, Sacith has realized the perfect means to pour anti-scale liquid into them.

Our anti-scale cap, with a clean and discreet design, is perfect for installation in minimalistic shower cabins and columns. It doesn't need any horizontal surface, but can be installed on vertical shower panels and walls.

Sacith anti-scale cap is available in two versions: one equipped with an integrated fast connector and one with rubber-holder, for traditional installation.

ISJTAPS0005 Scale-free cap with fast connector, chrome finishing.

ISJTAPSS005 Scale-free cap with rubber-holder, chrome finishing.
