

**MICROJET KIT
with separate air regulation.**

The Microjet kit is conceived as option that can be mounted in addition to standard hydro/air systems, to offer a special dorsal, lumbar or feet stimulating massage through a small Venturi jet. The jet is designed with the aim of allowing a very simple, time-saving and safe installation. The Microjet kit is offered with an air regulator that allows a separate control of the air to this system. For a cheaper installation, a junction between the microjet- and the jet- line air circuits is also possible (see: ISKMICJ6RJ05 Microjet kit with jet junction). The kit is installed with a pipe of small diameter that is inserted in fast connections integrated in the microjet body and in a compact manifold and therefore the mounting operations can be easily carried out in reduced spaces. The special tee-piece with microjet extension, makes the connection to the pump very fast and simple. All the parts composing the kit are MADE IN ITALY.

ISKMICJ6RA05 MICRO JET KIT- Separate air regulator

Item code	Description	Nr/Mt
1	ISJCO6PLR10 FAST CONNECTING MANIFOLD 6 EXITS	1
2	ISWSM250320 SMART LINE D. 30X32 Length 30 mm	1
3	ISRFA000388 BIFILAR CLIP 388 FOR MANIFOLD	2
4	ARTE25MJ32E TEE NO-GLUE EST. DIA. 25/25 + MICROJET EST. DIA. 32	1
5	ISBOMRJP5 PLASTIC MICROJET CHROME with fast connections	2
6	ISBOMRJOC5 PLASTIC MICORJET CHROME SIMPLE	4
7	RR90N10000 AIRSYSTEM FITTING 90° DIA. 10	7
8	RRTEE10000 AIRSYSTEM TEE-PIECE DIA. 10	4
9	TPECL10700 AIRSYSTEM PIPE 10X7	10
10	ISRAJET2010M RED. AIR TO JET 20/10 FOR MICROJET	1
11	ISPRNEW0105 AIR REGULATOR WITH CHECK VALVE Chrome	1
