

**MICROJET KIT
with jet air circuit connection.**

For a cheaper installation, beside the Microjet kit with independent air regulation, a system with a simple junction between the microjet- and the jet- line air circuit is suggested. All the advantages of the fast connections are maintained, but with an eye on costs.

The microjet is designed with the aim of allowing a very simple, time-saving and safe installation. The kit is installed with a pipe of small diameter that is inserted in fast connectors integrated in the microjet body, in a compact manifold and clicked into the air circuit of jets. The couplings that allow the connection with jets are available in two different diameters, both for standard jets and for minijets. The special tee-piece with microjet extension, makes the connection to the pump very fast and simple. All the parts composing the kit are MADE IN ITALY.

ISKMICJ6RJ05 MICRO JET KIT – with jet junction

Item code	Description	Nr/Mt
1	ISJCO6PLR10 FAST CONNECTING MANIFOLD 6 EXITS	1
2	ISWSM250320 SMART LINE D. 30X32 Length 30 mm	1
3	ISRFA000388 BIFILAR CLIP 388 FOR MANIFOLD	2
4	ARTE25MJ32E TEE NO-GLUE EST. DIA. 25/25 + MICROJET EST. DIA. 32	1
5	ISBOMRJP5 PLASTIC MICROJET CHROME with fast connections	2
6	ISBOMRJOC5 PLASTIC MICORJET CHROME SIMPLE	4
7	RR90N10000 AIRSYSTEM FITTING 90° DIA. 10	6
8	RRTEE10000 AIRSYSTEM TEE-PIECE DIA. 10	4
9	TPECL10700 AIRSYSTEM PIPE 10X7	10
10	ISRAJET1610M RED. AIR TO JET 16/10 FOR MICROJET	2
11	RRDIR1000 AIRSYSTEM FITTING STRAIGHT DIAM. 10	2
