

*3F Suction Unit is a patented model that enables you to implement 3 different functions: suction, cleaning and safety. Every function is modular and can be implemented by the customer as desired, independently from others.*

## SUCTION

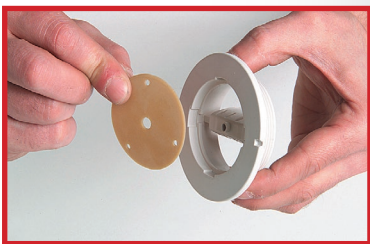

The suction unit has an elbow 90° (Ø40mm) to be connected directly to the suction pipeline/pump. An adapter 40/50mm is also available for line/pump 50mm inlet.

## SAFETY

Suction cover accordance to norms. In addition the safety is guaranteed by the mounting of a valve (optional) that intervenes to stop the pump in case the suction is occluded.

## Cleaning whirlpool pipeline system when bathtub is empty

Thanks to a special membrane (optional), 3F Suction Unit enables the cleaning of the hydromassage pipes with fresh water with empty bathtub.
